

Obstacles with Pipe Handles

Required Tools:

- ☐ 1/4" Hex Key
- ☐ 3/16" Hex Key

Step 1:

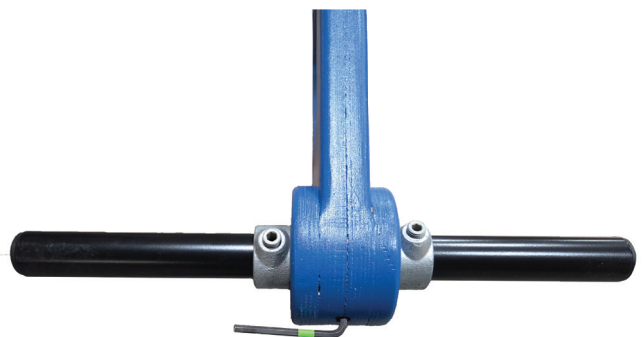

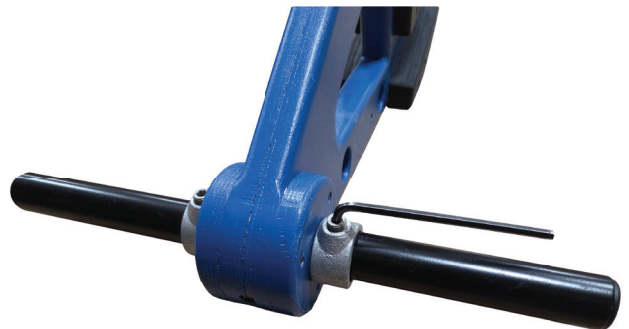

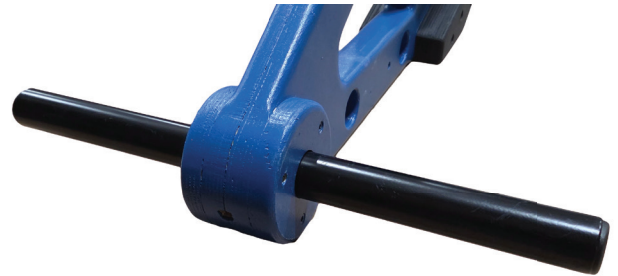

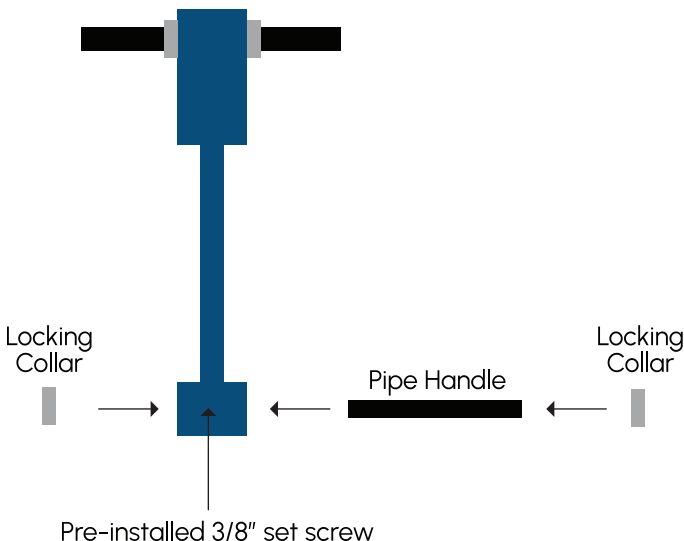

Insert the **Pipe Handle** through the designated hole in the obstacle. Slide one **KEE-75-6 Locking Collar** onto each side of the handle.

Step 2:

Tighten both **Locking Collars** with a **1/4" Hex Key** to prevent the **Pipe Handle** from sliding side to side.

Step 3:

Using a **3/16" Hex Key**, tighten the pre-installed 3/8" set screw on the bottom of the obstacle to lock the handle in place. For a more advanced challenge, leave the set screw loose to allow the **Pipe Handle** to spin freely.
