

Obstacles with Vertical Pipe

Recommended Tools:

- 5/32" (4.0 mm) Hex Key for 1.25" (1.66" OD) Pipe
- 3/16" (4.8 mm) Hex Key for 1.5" (1.90" OD) Pipe

Step 1:

Slide your ninja obstacle onto the vertical hanging pipe so that it is mounted above the welded Bottom.

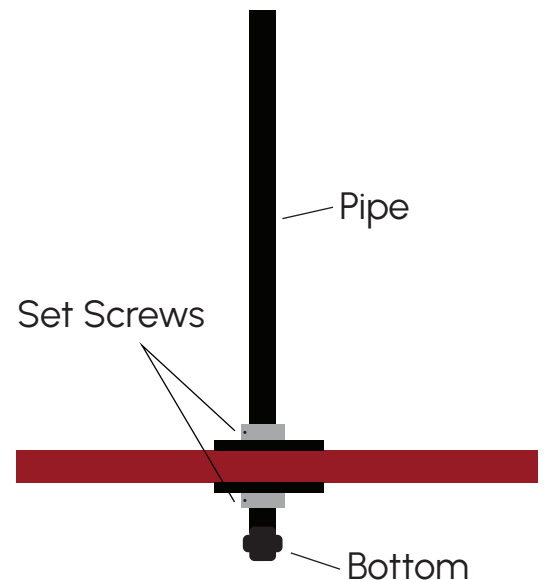

Step 2:

Rotate each bearing so that the Set Screws are facing the same position. This will ensure the obstacle is balanced correctly on the pipe.

Step 3:

Using the correct size Hex Key, tighten the set screws until they are firmly secured. Then hang the pipe with mounted obstacle on your rig.
